

## Re: Referral letter

Name : Ricardo Ortiz Pozo

Working with Ricardo created great value to the company.  
The performance he showed as below brought clear contribution.

### 1. Mechanical and Robotics Engineering Expertise

Demonstrated strong knowledge and hands-on experience in mechanical systems, with a particular focus on motion systems tailored for food automation environments.

### 2. Gantry System Design and Control

Led the development of the Gantry system's control logic from the ground up, including the integration of sensors and actuators. Ensured all components met reliability and safety standards for consistent operation.

### 3. Advanced Problem-Solving and Debugging

Successfully addressed complex engineering challenges such as reliable noodle transfer mechanisms, autonomous system startup/shutdown procedures, and robust exception handling during operational failures.

### 4. System Integration and Reliability Engineering

Ensured seamless integration between the robot's backend and frontend systems by effectively combining high-level logic with low-level

I am sure that he will be a great asset to whom it may work with him.
